3:50 Project Delivery with Purpose: Building the NT's Sustainable Future through Innovation

How Power and Water is transforming project delivery across energy, water, and sewerage systems to enable a cleaner, smarter Territory.

- As the Northern Territory faces rising climate pressure and increasing infrastructure evolution — from the rise of renewables to digital integration and decentralised assets — Power and Water Corporation has embraced transformation from within
- This session offers a behind-the-scenes look at the creation of a centralised Project Delivery Management (PDM) function — a model designed to streamline project execution, uplift capability, and embed innovation across energy, water, and sewerage delivery, to enable clean and sustainable utilities across the Northern Territory

Ahmad Mazloum, *General Manager, Project Delivery Management | Core Operations, Power and Water Corporation*

4:15 PANEL DISCUSSION

Financing the Transition: Unlocking Economic & Investment Opportunities

- Financing the transition to renewable energy
- The role of government policies and incentives
- The potential for energy projects investment to drive innovation and job creation in Australia's clean energy sector.
- The importance of collaboration between industry, government, and investors in achieving a sustainable and prosperous future
